

Georgia imported outdoor power supply

Overview

Between January and September, Georgia imported 1.1 terawatt-hours of electricity, a year-on-year increase of 129. Nearly 60 percent of that power came from Russia, with over 90 percent of the Russian imports used to supply the breakaway region of Abkhazia. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. Some of these energy sources are used directly while most are transformed into fuels or. In January 2025, Georgia doubled its electricity imports compared to the same period in 2024, while the cost of imported electricity surpassed \$9 million. In terms of direct electricity imports, the country's. Located in the South Caucasus region at the crossroads of Western Asia and Eastern Europe, Georgia is bounded on the west by the Black Sea, on the north by the Russian Federation (hereafter "Russia"), on the south by Türkiye and Armenia, and on the southeast by Azerbaijan. 6 million in the same period of 2024.
