

Large-capacity off-grid solar-powered container for hospital use

Overview

Enter the BESS Container for EU Mobile Medical Clinics: a towable 10ft powerhouse that sets up in 60 minutes, pairs with 5-15 kW solar panels, and keeps essential gear running 48+ hours off-grid. In 2025, the EU's HERA mandate demands 100% renewable power for mobile medical clinics—critical for rural and conflict zones where grid outages once derailed care (think spoiled vaccines or frozen ultrasounds). Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container. Facing lethal -30°C Arctic blackouts, a Northern Norwegian hospital deployed an engineering marvel: the Arctic BESS container. This isn't your average battery box.

Solar Container | Large Mobile Solar Power Systems

LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar arrays, reducing reliance

Can I run power to a shipping container? Off-Grid Solar

A solar-powered container can run lighting, sound systems, medical equipment or communications gear without waiting for grid hookups. Off-grid

Mobile Solar PV Container

A versatile mobile solar PV container offering plug-and-play green energy solutions with modular design, high-efficiency panels, and global mobility for off-grid and emergency power needs.
