

Solar power generation has benefits for early pregnancy

Overview

Solar power helps reduce air pollution by decreasing reliance on fossil fuels, which can have positive health impacts for pregnant women and developing fetuses. Universal access to modern energy and safe childbirth are global health priorities that are inextricably linked, yet little research has rigorously examined the adoption and effectiveness of solar energy systems in resource-constrained settings. The environmental benefits of solar power generally contribute to healthier living conditions for everyone, including expectant mothers. In Guatemala, Indigenous women and their children face high risk of death and illness due to barriers in accessing community-oriented, culturally friendly, and logistically convenient options for care. Casa Maternas, which are community-built, -owned, and -operated birthing centers established to.

Bringing Light to Maternal Health: Solar Power for Casa Maternas

In the case of the solar installations in the Casa Maternas, this infrastructure provides a more reliable source of electricity, which can avoid time lost with patients due to power outages,

Health Benefits of Sperm During Pregnancy

Discover how exposure to sperm might help prevent preeclampsia and ease morning sickness, offering potential health benefits for pregnant individuals.

Photoprotection in pregnancy: addressing safety

This review explores the effects of photoprotection during pregnancy, focusing on safety, efficacy, and the role of sunscreens in preventing pregnancy

Pregnancy, Wireless and Electromagnetic Fields

Pregnancy is a time when development is most vulnerable. Wireless radiation and electromagnetic fields are part of a growing list of environmental exposures

The Health Benefits of Solar Power Generation

Abstract Renewable energy can yield social benefits through local air quality improvements and their subsequent effects on human health. We estimate some of these benefits using data gathered during

Associations of solar activity and related exposures with fetal growth

Solar and geomagnetic activity have been shown to suppress melatonin and to degrade folate levels, important hormones for fetal development. We examined whether solar and

We Care Solar Suitcase: Providing Clean Energy for Safe Childbirth

It is the only renewable pre-wired 12-volt DC power source co-designed by an obstetrician for maternal and newborn care. It has improved the quality and timeliness of care in

Impact of Solar Light and Electricity on the Quality and Timeliness of ...

We evaluated the implementation and effectiveness of the We Care Solar Suitcase, a complete solar electric system that provides medical lighting and electrical power for charging small medical devices

7 Benefits of Renewable Energy Use

There are many positive impacts of generating electricity from renewable energy sources, including the benefits of wind, solar, geothermal,

Sustainable Energy for Safe Childbirth | Ethiopia, Sierra Leone ...

We Care Solar works to ensure women can safely deliver their babies by bringing solar power to remote, off-grid, under-resourced medical centers.

Latest Videos | CNN

The US and Iran say they have reached an agreement that will end a US blockade of Iranian ports and reopen the Strait of Hormuz. Iranians in Tehran welcome the outcome but remain cautious.

Impact of Solar Light and Electricity on the Quality and Timeliness of ...

Lack of access to reliable energy is a major neglected health system challenge to maternal and child health. We found that installing a solar energy system intervention in rural

Is there an association between solar power exposure and congenital ...

Solar power is a renewable energy source that converts sunlight into electricity through photovoltaic panels or concentrated solar power systems, and there is no evidence suggesting that it
