

Solar power satellite factory in Kyrgyzstan

Overview

In December 2025, the country inaugurated its first solar power plant in the Chui region, approximately 100 kilometers east of Bishkek. The 100-megawatt facility was constructed with \$56 million in Chinese investment and is expected to generate around 210 million kWh of clean. The commissioning ceremony for the first stage of the largest solar power plant in Central Asia, ROX Issyk-Kul, took place in the village of Kyzyl-Oruk in Issyk-Kul region, with the participation of President Sadyr Zhaparov. Currently, the plant generates 175 megawatts of electricity, and the total investment at this stage has reached 130 million US dollars. This plant will be the second largest after the. On June 8, 2026, SpaceX officially unveiled its most ambitious hardware yet — the AI1 satellite, the first generation of its orbital artificial intelligence compute platform. The solar power plant is located in the. J. Technology GmbH is a German engineering company specializing in turnkey solar module production lines and manufacturing consulting, with project experience ranging from 20 MW to 500 MW per production line, including multi-line and gigafactory projects exceeding this scale.
