

# Venezuela solar energy policy

## Overview

The Venezuelan government has initiated several programs and policies to promote solar energy production in response to its ongoing electricity crisis. The renewable energy market in Venezuela is projected to grow at a compound annual growth rate of over 3. Nov 21, 2024 Photo: EFE November 21, 2024. IRENA promotes the widespread adoption and sustainable use of all forms of renewable energy, including bioenergy, geothermal, hydropower, ocean, solar and wind energy, in the pursuit of The Zulia and Venezuela Solar associations are asking the government to use its political and commercial ties. The clean energy transition had real momentum at the end of 2024. It was buoyed by federal support, billions of dollars of investment in new technologies, and broad. For years, the energy transition was discussed as a shift that would happen in steady, predictable increments. There is also a competition from wind energy development. Given its status as an oil-producing nation with the world's largest reserves, the Bolivarian Republic of Venezuela approaches the just energy transition by diversifying its energy matrix through the incorporation of technologies that harness new sources of renewable and alternative energies—such.
